Abstract of JP8004347

PURPOSE:To make it possible to instal a car storage space in front or in rear of an exclusive elevator device and a pallet type mechanical multistory parking space and minimize imposed installation space limitations of this parking space and increase the degree of freedom.

CONSTITUTION:A vertically transferable car storage conveyer 18 is laid out on a lift mount 4c and a turn table device 17. A pair of front and rear transfer carts 23a and 23b, which are movable in the vertical conveying direction of the car storage conveyer 18, are provided at the lift mount 4C. A front transfer conveyer device 27a, which supports the front wheel of a car and which is horizontally transferable, is installed to the front transfer cart 23a while a rear transfer conveyer device 27b, which supports a rear wheel of a car and which is horizontally transferable, is installed to the rear transfer cart 23b. The front transfer conveyer device 27a is adapted to rise freely by way of a lift device 28.
